EDUCATION

University of Southern California, Marshall School of Business — **Los Angeles, CA**
Master of Science in Business Analytics | GPA: 3.81/4.0 — *Aug 2025 - Expected May 2027*

University of Rochester — **Rochester, NY**
B.S. in Applied Mathematics; B.A. in Business | GPA: 3.7/4.0 — *May 2025*

TECHNICAL SKILLS

Analytics & BI: SQL, Python, RStudio, Tableau, Microsoft Excel (PivotTables, Lookup Formulas)
Data Systems & Product: PostgreSQL/PostGIS, FastAPI, REST APIs, TypeScript, React Native, Mapbox
Languages: Chinese (Native), English (Advanced)

EXPERIENCE

China Everbright Bank — **Anhui, China**
Corporate Banking Analyst Intern — *May 2024 - Jul 2024*

- Performed financial statement analysis and corporate credit analysis for 5+ clients by reviewing financial statements, enterprise-credit records, and operating documents, supporting due diligence and internal credit reviews.
- Analyzed balance-sheet liabilities, cash-flow patterns, interest-bearing debt ratios, and working-capital indicators in Excel, translating records into liquidity analysis, solvency analysis, and financial ratio analysis for internal decision-making.
- Coordinated with client finance offices to validate and resolve missing information across 10+ financial, credit, and operating documents, strengthening documentation quality and stakeholder coordination.

SELECTED PROJECTS

WildPath - Wildlife Collision Prevention MVP — **Los Angeles, CA**
Independent Product & Engineering Project — *Aug 2026 - Present*

- Designed and built a mobile-first wildlife-collision prevention MVP using React Native, TypeScript, FastAPI, PostgreSQL/PostGIS, and Mapbox, combining clearly labeled synthetic risk zones with recent driver reports and route-level risk analysis.
- Implemented geospatial route analysis, anonymous location-based reporting, destination search, driving routes, and visual and voice hazard alerts; added API validation, rate limiting, structured logging, and automated backend/API tests.

Flight Delay / Missed Connection Risk Simulation — **Los Angeles, CA**
Excel Monte Carlo Simulation Workbook — *Apr 2026 - May 2026*

- Built an Excel decision model to test four layover-buffer scenarios and identified a 90-minute strategy that reduced simulated missed-connection risk from 8.7% to 3.9% versus a 45-minute buffer.
- Developed scenario analysis and Monte Carlo outputs comparing wait time, expected cost, and disruption risk, supporting a practical balance between convenience and reliability.
- Presented balanced and conservative recommendations for different risk tolerances, translating quantitative results into actionable decision guidance.

Insurance Risk-Based Pricing — **Los Angeles, CA**
Python, Tweedie XGBoost, Random Forest, Cross-Validation — *Jan 2026 - May 2026*

- Contributed to a team framework for claim occurrence, loss cost, and historically adjusted loss cost; owned the HALC modeling workstream, prepared insurance data, and removed post-outcome variables to prevent target leakage.
- Compared Tweedie XGBoost with a Random Forest benchmark using grid search and cross-validation; selected Tweedie XGBoost for zero-heavy, right-skewed loss severity, achieving a validation MSE of 997,698 (RMSE approximately 999).
- Interpreted feature importance to identify policy, vehicle, payment, and renewal risk drivers and translated results into risk-based pricing, underwriting review, and risk segmentation recommendations; the project earned 2nd place in the course competition.

TuneWorks SQL Business Intelligence Project — **Los Angeles, CA**
SQL EDA and Executive Recommendation Case — *Sep 2025 - Nov 2025*

- Organized a fragmented relational database by building a data dictionary and documenting relationships across agents, customers, entertainers, bookings, and music styles.
- Created reusable SQL business intelligence views to track revenue, booking volume, agent performance, customer preferences, and entertainer demand, supporting KPI reporting for management decisions.
- Converted SQL outputs and Python visualizations into business intelligence insights and executive reporting for booking strategy, talent allocation, and growth opportunities.
